

LATERAL PROTECTION / PROTECCIÓN LATERAL

TECHNICAL FITTINGS INSTRUCTIONS RELATED TO LATERAL PROTECTION, according to R73 reglement.

The vehicles belonging to N2, N3, O3 and O4 classes must be built and equipped, in order to offer the road users (pedestrians, cyclist...) an efficient protection against the risk of falling under a lateral part of the vehicle and slipping under the wheels.

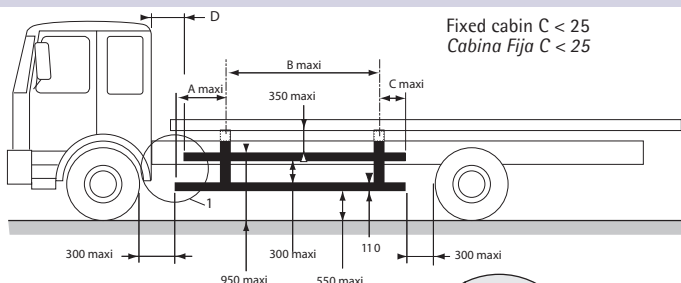

PRESCRIPCIONES TECNICAS RELATIVAS A LA PROTECCION LATERAL, según la reglamento R73.

Los vehículos de las categorías N2, N3, O3 y O4 deben estar contruidos y equipados de forma que ofrezcan a los usuarios de la carretera (peatones, ciclistas, etc.), una protección eficaz contra el riesgo de caer bajo una parte lateral del vehículo y pasar bajo las ruedas.
